Education

European Master for Industry in Microwave Electronics and Photonics (EMIMEP)

M1 Grade: 15 out of 20. Thesis Grade: 9.5 out of 10

Sep 2024 – Aug 2026

University of Limoges, France¹

University of Brescia, Italy

University of the Basque Country, Spain¹

Bachelor of Science in Electrical and Electronic Engineering (EEE)

CGPA: 3.77 out of 4.00

Apr 2018 – Jan 2023

Ahsanullah University of Science and Technology, Bangladesh

Experience

Engineering Intern

TSR Lab

Feb 2026 – Aug 2026

University of the Basque Country (EHU)

- Field: Wideband Radio Channel Characterization in Industrial Environments Using a Channel Sounder in Industrial Environments

Junior Lecturer

Department of Electrical and Electronic Engineering

Nov 2023 – Aug 2024

Dhaka International University, Bangladesh

- Instructed lab courses to undergraduate students and delivering lectures when necessary
- Arranging and participating in seminars and other activities on campus

Part-time Research Assistant

Department of EEE

Jul 2023 – May 2024

Ahsanullah University of Science and Technology, Bangladesh

- Research Grant: Novel design & performance analysis of Photonic Crystal fiber sensors for medical and chemical applications.

Technical Skills

- **Programming languages and Workspace:** MATLAB, Python, LaTeX, MS Office, Google Workspace
- **Tools:** Electronic and Optical Spectrum analyzers, Channel sounders, Vector network analyzers (VNA), Noise figure analyzers, FPGA.
- **Simulators:** MATLAB, Simulink, ADS, LabVIEW, CST Studio, Ansys HFSS (basics), etc.

Projects

- Design of frequency-variation and phase-variation microwave sensors using ADS Momentum
- Design, Matching, and Nonlinear Analysis of a GaAs RF Power Amplifier using ADS Momentum
- CSRR Sensor-based Prediction of Ethanol Concentration in Water using PLS Regression
- Linear & non-linear amplifier characterization using spectrum analyzer and noise figure analyzer
- Simulation and Analysis of RF Resonant Cavities for Accelerator Applications using CST Studio
- Theoretical and numerical analysis of the role of chirp in pulse propagation in optical fibers.
- Bachelor thesis: Optical Properties of A Graphene Based Defective One-Dimensional Photonic Crystal

Publications and Interests

Field of Interests

- RF and microwave technology, Telecommunication and biomedical applications, Sensors, Optoelectronics, Signal processing etc.

Journals

- Detection of tuberculosis in blood samples using one-dimensional photonic crystal, **Optical and Quantum Electronics**, 2025
- Simulation Analysis of a Highly Sensitive Biosensor for Early Detection of Cancer Cells Based on a 1D Photonic Crystal, **ECS Journal of Solid State Science and Technology**, 2025
- A high-performance biosensor design for waterborne bacteria detection based on one dimensional photonic crystal, **Physica Scripta**, 2023

Honors and Awards

- | | |
|---|--------------------|
| – ERASMUS Mundus Scholarship, EMIMEP 2024-26 | Sep 2024 |
| – Dean's Honor Award, AUST | Jan 2023 |
| – Scholarship based on academic performance, AUST | Fall 2019 and 2020 |

Languages

- English (Proficient - C1)
- Bangla (Native)
- French (Basic)
- Spanish (Basic)

Extracurriculars & Certifications

- | | |
|--|--------------------|
| – Volunteer, Erasmus Student Network (ESN) | Aug 2026 - Present |
| – Volunteer, European Microwave Week (EuMW 2025), Utrecht, The Netherlands | Sep 2025 |
| – Participant, VII International Science and Technology Week in Zaragoza (ISTWZ), Spain | Jun 2025 |
| – Python for Beginners, SkillUp by Simplilearn | 2023 |
| – Basic Safety Training, Samsung C&T Corporation | Oct 2022 |
